

Enterprise Guide - The New Features in Version 1.2

Jeremy Rankcom
SAS UK

The Power to Know™

Enterprise Guide

- Product Status
- What's New in 1.2
 - projects
 - columns
 - data
 - query
 - OLAP
 - tasks
 - performance
- Technical Resources Available

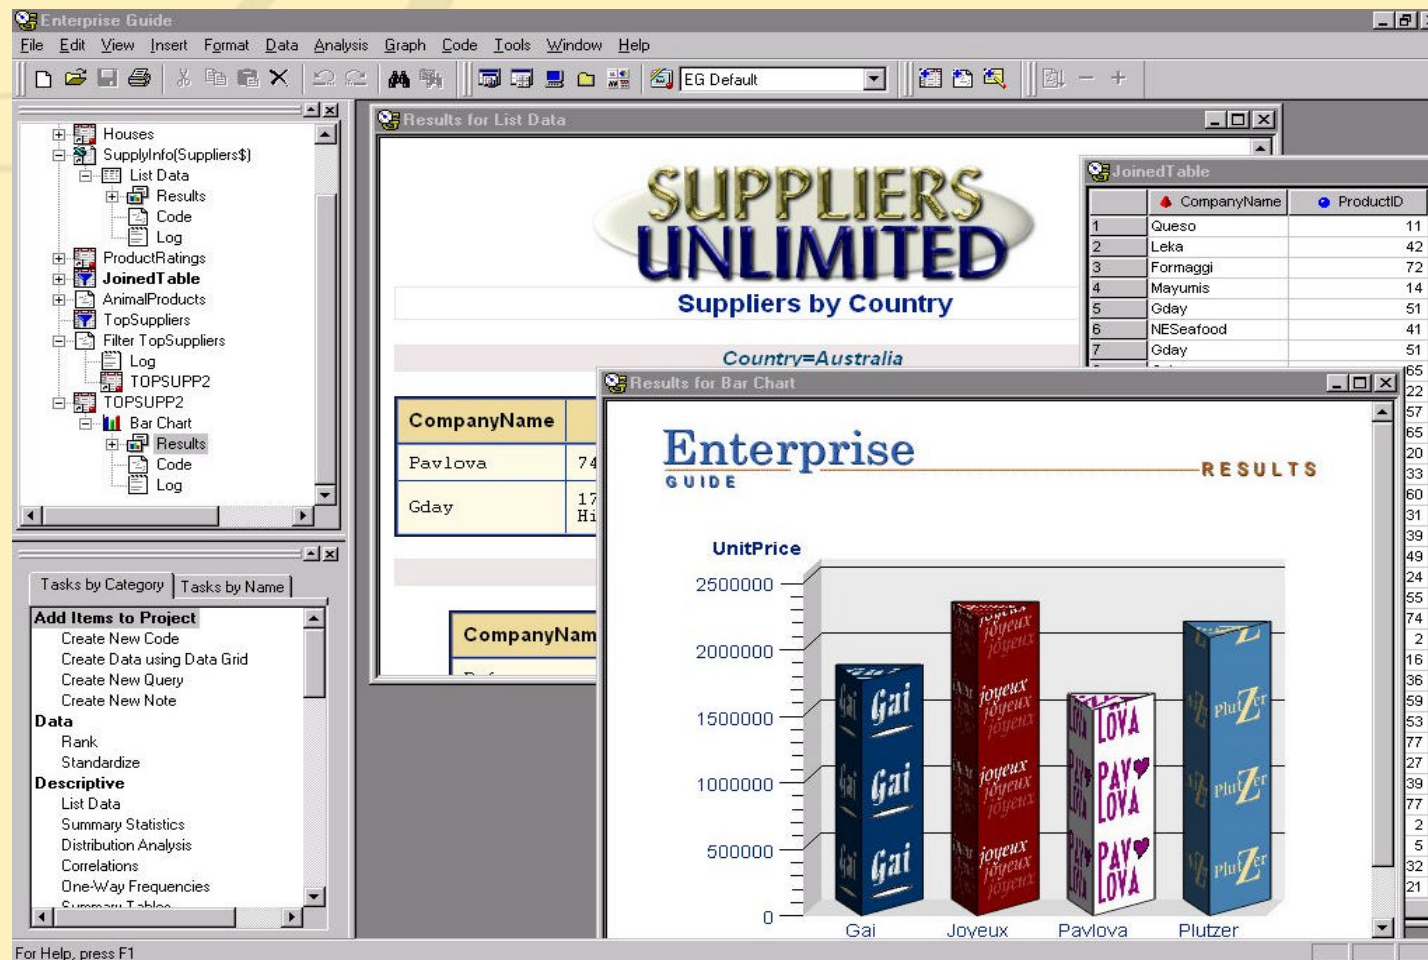

Enterprise Guide

“Enterprise Guide brings the full power of SAS to your desktop in a Windows client application by providing transparent access to your data with interactive dialogs, wizards and property sheets to lead you easily through analytical and reporting tasks.”

Enterprise Guide Status

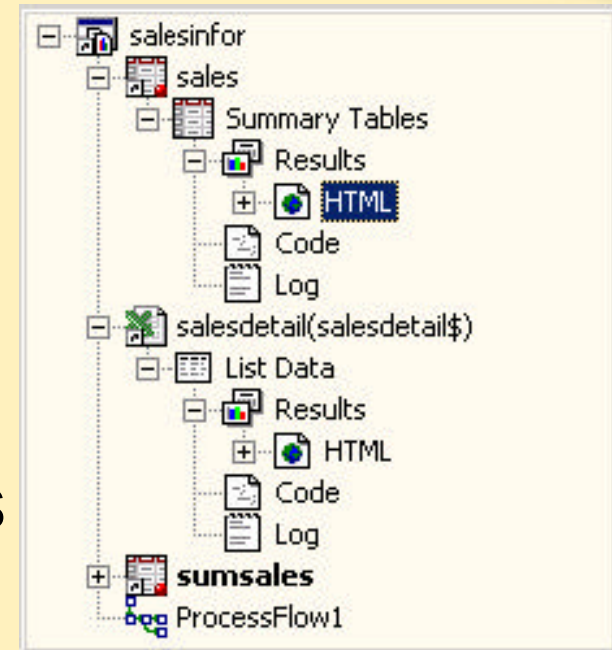

- Latest release EG 1.2 now shipping
- Uses SAS 8.0, 8.1 and 8.2 servers
- SAS 8.2 recommended
- Next release EG 1.3 ????

What's new

Projects

- Reorder project nodes via DND
- Modify existing data links
- PDF and RTF results
- Create folders in binders via open dialog
- Print Preview supported

Create Format

Options Define Format

How to define a format:

1. Select [New Label] to create a value label.
2. Type the new label in the Label edit field.
3. Select [New Range] to enter values or ranges for the above label.
4. Enter each value or range as a separate item.
5. Repeat steps 1-4 for each value label.

An example format can be found in the Help.

Label	Ranges
On Hold	H h
Boxed and Ready	B b
Shipped	S s

New Label
Remove Label

New Tasks

- Append
- Random Sample
- Transpose
- Register MDDDB

Performance Enhancements

Prevent data
grid opening

Defer query
results

Control thresholds
for performance
warnings

Performance

- Faster scrolling of wide and big data in data grid
- Prompt before opening large results
- Save query output as dataset
- Improved support with Pass-Through

SAP Certified

- Open up the SAP data warehouse with Enterprise Guide 1.2.
- Web-download/hot fix, available on the SAS tech support site.
- Rolled into the production release of EG 1.3 later this year
